

CURRICULUM VITAE

Alexey Belyanin

Department of Physics & Astronomy, Texas A&M University,

College Station, TX 77843-4242

Phone: (979) 845-7785, Fax: (979) 845-2590

E-mail: belyanin@tamu.edu

<http://people.physics.tamu.edu/belyanin/>

Main Fields of Research

Coherent and ultrafast optical phenomena

Nonlinear optics

Physics of semiconductors, nanostructures, and novel materials

Physics of optoelectronic devices

Quantum optics and electrodynamics

Plasma physics, astrophysics, and cosmology

Education

PhD in Physics from the Institute of Applied Physics of the Russian Academy of Sciences (1995).

M.S. in Physics with honors from Nizhny Novgorod State University (1989).

Appointments

Sept. 2013-present: Professor and Associate Head, Department of Physics & Astronomy, Texas A&M University

Sept. 2010-present: Professor, Department of Physics, Texas A&M University

Sept. 2007 – 2010: Associate Professor, Department of Physics, Texas A&M University

Sept. 2003 – 2007: Assistant Professor, Department of Physics, Texas A&M University

Sept. 1999 – August 2003: Assistant Research Scientist, Department of Physics, Texas A&M University

1989-1999: Junior Research Scientist, Research Scientist, Senior Research Scientist, Institute of Applied Physics of the Russian Academy of Sciences

1992-1999: Part-time professor at Nizhny Novgorod State University

Awards and Honors

- Fellow, Optical Society of America (OSA), 2018
- Fellow, International Society for Optics and Photonics (SPIE), 2015
- Fellow, American Physical Society, 2012
- JoAnn Treat Research Excellence Award, 2007
- NSF CAREER Award, 2006
- University of Jena, Abbe School of Photonics Lectureship, 2011

- Lund University Lectureship, 2011
- Russian Academy of Science Award for Outstanding Young Investigators, 1998
- President of Russian Federation Scholarship for Outstanding Young Scientists, 1993-1996
- Open Society Fellowship, 1993-1995

Teaching Experience

- Physics 485 “Cavity QED, nanophotonics, and quantum information”, 2019-2021
- Physics 309 “Modern physics”, Spring 2017, 2018, 2019, 2020
- Physics 649 “Physics of optoelectronic devices”, Spring 2011, 2015, 2016, 2021
- Physics 302-303 “Advanced Mechanics”, Fall 2011-Spring 2014
- New graduate course Physics 689 “Physics of optoelectronic devices”, Spring 2007, 2008, and 2009
- ASTR 314 “Survey of Astronomy”, Texas A&M University, Spring 2010
- Physics 218 “Mechanics”, Fall 2007 and 2008, Summer and Fall 2009, Summer 2010 and 2011.
- Physics 306 “Basic Astronomy”, 2004-2006.
- Faculty advisor, Society of Physics Students, TAMU Chapter: Sept. 2006-present. Weekly or bi-weekly meetings with undergraduate physics majors, ~ 10 tutorial lectures per year.
- Physics 219 “Electricity and Magnetism”, 2001.
- “Theoretical Mechanics”, Nizhny Novgorod State University, 1994-1998.
- Public lectures, Nizhny Novgorod Planetarium, 1994-1999. Over 300 lectures. Over 20 new shows created

Funding

(i) Current grants:

NSF: QII – TAQS: Quantum Circuits through Symmetry-driven Valley Optoelectronics, 2019-2023

AFOSR: Nonlinear and THz studies of electro-optic and magneto-electric materials, 2014-2020

ONR: Fully Automated Quantum Cascade Laser Design Aided by Machine Learning with up to 100X Design Cycle Time Reduction, Phase I, 2020.

NSF: Compact room temperature operated THz emitters with scalable architecture and low electric power consumption, 2017-2020

NSF: Novel quantum cascade laser sources for terahertz sensing, 2018-2021

TAMU: T3 grant, X-grant, STRP grant, FAPESP-TAMU grant

(ii) Previous grants:

NSF: Quantum cascade laser sources of high-power, coherent frequency combs, 2016-2019

AFOSR: Nonlinear Optics and Electrodynamics of Systems with Massless Dirac Fermions, 2015-2018

NSF Engineering Research Center: “Mid-infrared Technologies for Health and the Environment (MIRTHE)” 2006-2016

NSF PIRE: “TERANO: Terahertz Dynamics in Nanostructures” 2011-2016

NSF: “Ultrashort pulses and frequency combs from mid-infrared quantum cascade lasers”, 2012-2015.

NHARP: “Room-temperature electrically-pumped semiconductor sources of THz radiation 2010-2013”

US Dept. of Education: “FIPSE, United States-Russia Program: Improving Research and Educational Activities in Higher Education” 2010-2015

NSF PIRE: “U.S.-Japan Cooperative Research and Education: Ultrafast and Nonlinear Optics in 6.1-Angstrom Semiconductors” 2006-2011

NSF CAREER: “Active integrated nanostructure devices for infrared photonics and femtosecond pulse generation” 2006-2011

EU grant with Univ. Sheffield: “Exploring Short Wavelength Limits for High Performance Quantum Cascade Lasers” 2010-2013

NSF: “Room-temperature terahertz semiconductor Raman lasers” 2009-2012

AFOSR: “New widely tunable room temperature THz coherent sources”, 2005-2008

NSF: New Types of Mid/Far-Infrared Semiconductor Lasers for CW Room-Temperature Operation, 2005-2008

AFOSR: New Mid/Far-Infrared CW Room-Temperature Semiconductor Lasers Based on Intralaser Wave Mixing, 2005-2008

DURIP 2006: Ultrafast imaging system for time-resolved studies and development of high-power mid/far-infrared semiconductor sources

Sponsor: AFOSR, 2006.

Synergistic and Outreach Activities:

Chair of the International Conference “Novel in-plane semiconductor lasers”, held annually within the SPIE Symposium “Photonics West”, 2008-2021.

Co-chair of the International Conference “Infrared and Terahertz Technologies for Health and Environment”, held in 2005-2007 in Boston, MA, within the SPIE Symposium “Optics East”.

Organizer of special sessions at the annual Winter Colloquium on the Physics of Quantum Electronics (PQE), 2003-2007, 2015, 2016, 2019

Program Committee member of the International Semiconductor Laser Conference (ISLC), 2017 and 2018.

Program Committee member of the 36th International conference “Infrared, mm, and THz waves”, October 2011 (Houston).

Program Committee member of the International Quantum Cascade Laser School and Workshop, Cambridge UK, 2016.

Program Committee member of the International Symposium Fundamental & Applied Problems of Terahertz Devices & Technologies, Sendai, Japan 2016.

Faculty advisor for the Society of Physics Students, TAMU Chapter, since 2006.

Co-founder and organizer, Mitchell Institute Physics Enhancement Program (MIPEP): an intense 2-week summer program for high school physics teachers sponsored by the Mitchell Foundation and Texas A&M University. Every summer since 2012.

Review panelist for several NSF programs and other federal agencies: AFOSR, DARPA, ARPA-E, and ARO.

Frequent reviewer of papers submitted to Science, Nature journals, Physical Review Letters, Optics Letters, Nano Letters, Optics Express, ACS Nano, Applied Physics Letters, Physical Review A and B, and many other journals. Reviewer for McArthur Foundation.

Extensive outreach activity. Since 2003: hundreds of lectures and physics demonstrations for K-12 students, school teachers, and general public. Numerous invited lectures, demonstrations, and telescope viewing activities at the outreach programs and events on campus, such as Physics & Engineering Festival, Math Awareness Month, Saturday Morning Physics, International Year of Light, World Year of Physics, Expanding Your Horizons, Society of Hispanic Engineers, Youth Adventure Camp, Davidson Young Scholars, MIPEP, etc. Guest lectures for OSA and SPS Chapters. Some of these lectures are posted on my webpage <http://faculty.physics.tamu.edu/belyanin/education.htm>

Professional Societies:

- American Physical Society, Fellow
- International Society for Optics and Photonics (SPIE), Fellow
- Optical Society of America (OSA), Fellow

Publications:

- Number of papers in peer-reviewed journals: 150
- Reviews and Book Chapters: 8
- 5 US Patents
- Editor of the Proceedings of the International Conferences “Photonics West” (11 volumes) and “Optics East” (SPIE Proc. Vol. 6010 and 6386).
- Media coverage in news articles in Nature, Science, Nature Photonics, Laser Focus World, Optoelectronics Magazine, many online news servers, Aggie Daily News, College of Science News, etc.

Research Supervision:

Postdoctoral researchers:

Aleksander Wojcik: 2007-2013

Yongrui Wang: 2015-current

Graduate students:

Dmitry Pestov (co-advised with V. Kocharovsky): 2002-2004

Debin Liu: received MS in 2005

Feng Xie: received PhD in 2008 (Corning; now in Thorlab)

Venkata Chaganti: received MS in 2008

Don Smith: received PhD in 2013 (Freescale)

Yonghee Cho: received PhD in 2011 (Samsung)

Yongrui Wang received PhD in 2015 (research scientist at TAMU)

Xianghan Yao: received PhD in 2014

A. Ryan Kutayah, 2013-2019 (PhD) (postdoc, Department of Chemistry, TAMU)

Zhongqu Long, 2014-2019 (PhD) (Google)

Sultan Almutairi, 2016-current

Qianfan Chen, 2017-current

Zicheng Wang, 2017-2019 (M.Sc.) (Software engineer at SAP)

PUBLICATIONS

Book Chapters:

1. A. Belyanin, F. Capasso, and M. Troccoli, Raman injection and inversionless intersubband lasers, Chapter 6, in: *Intersubband Transitions in Quantum Structures*, ed. by R. Paiella, McGraw-Hill, 2006, 181-236.

2. C. Gmachl, O. Malis, and A. Belyanin, Optical Nonlinearities in Intersubband Transitions and Quantum Cascade Lasers, Chapter 5, in: *Intersubband Transitions in Quantum Structures*, ed. by R. Paiella, McGraw-Hill, 2006, 237-284.

3. A. Belyanin, G.R. Welch, and M.O. Scully, Atomic Coherence Phenomena, in: *Encyclopedia of Modern Optics*, edited by Robert D. Guenther, Duncan G. Steel and Leopold Bayvel, Elsevier, Oxford, 2004, ISBN 0-12-227600-0, 247-255.

Patents:

1. Infrared generation in semiconductor lasers. Scully M.O., Belyanin A.A., Kocharovskiy V.V., U.S. Patent granted on August 24, 2004 (No. 6,782,020).

2. Detecting infrared radiation. Boyd R.W., Haden C.R., Scully M.O., Belyanin A.A., Kocharovskiy V.V., U.S. Patent Granted on May 4 2004 (Patent No. 6,730,910).

3. "Phase Matched Parametric Light Generation in Monolithically Integrated Intersubband Optical Devices", A. Belyanin, A.Y. Cho, C. Gmachl, O. Malis, M.L. Peabody, A.M. Sergeant, D.L. Sivco, Patent granted September 6, 2005. (Patent No. 6,940,639).

4. "Raman injection and inversionless lasers", A. Belyanin, F. Capasso, and M. Troccoli, Patent submitted to USPTO, Application 11/027,398.

5. "Method and apparatus for generating terahertz radiation", M. Belkin, F. Capasso, A. Belyanin, Patent No. 7,974,325 (2011).

Publications in peer-reviewed journals:
